

**GREENING COMMITTEE RESTAURANT LIST**

The restaurants on this list opted to participate in the Greening Committee's sustainability coaching program, and completed at least one sustainability action leading up to Greenbuild 2015. Support was provided by the DC Sustainable Energy Utility (DCSEU), which supplied energy efficiency starter kits containing a variety of LED bulbs and faucet aerators, as well as hands-on assistance installing the kits, if needed. DC law requires that all commercial buildings recycle at least the following items: glass, metal, paper, corrugated cardboard, and narrow-necked plastic bottles.
